

# ICS-1573

Corrosion Inhibitor

International  
Chemical  
Group

## Description:

ICS-1573 is a concentrated blend of amines, amido-amines, volatile amines and surfactants.

## Applications:

ICS-1573 is a unique concentrate of amines that provides excellent corrosion inhibition in a wide range of applications especially in gas transportation systems.

It is effective in both sweet (carbon dioxide only) and sour (hydrogen sulfide) systems.

ICS-1573 is non-gunking, non-emulsifying and non-foaming making it ideal for gas gathering and distribution systems.

## Dosage:

Typically formulations with ICS-1573 will be diluted three to four times in kerosene for distribution into both oil and gas phases, heavy aromatic naphtha for additional oil solubility or alcohol for water dispersion.

Application rates will be dependent upon the severity of the corrosive elements in the system that is being treated.

## Physical Properties:

Physical Form	Liquid
Appearance	Clear Brown Viscous
Activity	70%
Specific Gravity:	0.94
Flash Point:	> 61 C (> 142 °F)
pH (10%)	7-8
Solubility	Hydrocarbon

## Handling:

Please refer to the Safety Data Sheet for further handling information.

## Packaging:

ICS-1573 is available in drum, tote, and bulk quantities.
