

International Chemical Group

Hydrogen Sulfide Scavenger

Description:

ICS-5740 is a forty percent active watersoluble triazine (Hexahydro-1,3,5-tris hydroxyethyl-s-triazine.)

Applications:

ICS-5740 can be used to remove hydrogen sulfide in oilfield and industrial applications. It can also be used as a biocide and algaecide.

This product can be applied continuously or by batch treating. It can also be used in bubble tower applications.

Dosage:

The ICS-5740 can be used as supplied or diluted further with other water-soluble solvents such as water, alcohols and glycols. It is compatible with anionics, cationics and non-ionics.

The dosage will be dependent upon the amounts of hydrogen sulfide that are present in the fluids being treated.

Physical Properties:

Physical Liquid

Form

Appearance Colorless to light

yellow

Activity 38 – 42%

Specific 1.00 - 1.10

Gravity:

Flash Point: 12 C (54 °F)

pH 10-12

Solubility Water

Handling:

Please refer to the Safety Data Sheet for further handling information.

Packaging:

ICS-5740 is available in drum, tote, and bulk quantities.
