

ICS-6055

Pipe Releasing Agent

International
Chemical
Group

Description:

ICS-6055 is a spotting fluid used for stuck drill pipe.

Applications:

ICS-6055 is a mixture of surface-active agents in aromatic solvent that is used in oil-based drilling systems as a highly effective stuck-pipe spotting fluid.

When differential sticking of pipe occurs, ICS-6055 allows oil solutions to pass through the water based filter cake that lies in between the wellbore and the stuck pipe, which will free the stuck pipe.

Dosage:

ICS-6055 is applied in a pill application to release a differentially stuck pipe.

After using ICS-6055 as a spotting fluid, it can be incorporated into the active mud system that will also help reduce torque and drag which helps prevent additional differential sticking.

Physical Properties:

Appearance: Amber to dark brown liquid

Solubility: Oil

Specific Gravity: 0.90 @ 25°C (77°F)

Flash Point: > 93.3°C (200°F)

Handling:

Please refer to the Safety Data Sheet for further handling information.

Packaging:

ICS-6055 is available in drum and tote quantities.
