ICS-DSE-1

International Chemical Group

Secondary Emulsifier

Description:

ICS-DSE-1 is an extremely efficient, highly concentrated emulsifier and wetting agent.

Applications:

ICS-DSE-1 is a secondary oil mudemulsifying agent used to emulsify water in hydrocarbon environments. It improves the wettability by the oil of the solids dispersed in the invert emulsion mud.

ICS-DSE-1 is thermally stable to 150°C (300°F).

Dosage:

ICS-DSE-1 can be diluted with kerosene, diesel, or most aromatic napthas. A typical dilution is 30% to 50%.

Physical Properties:

Appearance: Dark viscous liquid

Solubility: Oil

Specific 0.90 - 0.94 @ 25°C Gravity: (77°F)

Flash Point: > 93°C (200°F)

Handling:

This product is combustible and should be kept away from open heat sources. Please refer to the Safety Data Sheet for further handling information.

Packaging:

ICS-DSE-1 is available in drum quantities.
