

ICS-DX

Road Dust Suppressant

International
Chemical
Group

Description:

ICS-DX is a water-soluble dust suppressant concentrate. It binds dust particles and prevents them from becoming airborne.

Applications:

Hazardous road conditions result as dust clouds create poor visibility and driving conditions that ultimately slow down production around mining complexes, industrial and construction sites. ICS-DX can eliminate these hazardous conditions by creating a skid resistant, water repellent surface.

ICS-DX succeeds in cutting down the amount of airborne dust that carries disease, irritates eyes and harms the respiratory tract. After the application of the diluted ICS-DX the results are a firm, non-tracking, water resistant durable surface that seals dust and will not crust. ICS-DX can be used on unpaved roads and walks, parking lots, haul roads, truck and yard shops.

Physical Properties:

Appearance	Clear black thin liquid
Solubility	Water
Specific Gravity:	1.00
Flash Point:	> 100°C (> 212 °F)
pH:	4-5

Recommended Dosage:

ICS-DX is concentrated product and should be diluted at least 20% in water prior to spraying. This diluted product can then be spread at a rate of 0.025 gallons per square foot of area to be treated.

Handling:

Please refer to the Safety Data Sheet for further handling information.

Packaging:

ICS-DX is available in drum or tote quantities.
