

ICS-7000 Series

Demulsifier Series

International
Chemical
Group

Description:

Demulsifier and / or surfactant concentrates.

Applications:

The ICS-7000 series are used for a variety of applications, depending upon the characteristics of the emulsion you are trying to resolve.

A technical specialist should test each product in order to determine what application and treatment rate best suits each individual intermediate.

Dosage:

Dosages will be determined using various laboratory and field testing methods which often will incorporate the use of multiple demulsifiers in various concentrations.

Physical Properties:

Refer to each individual SDS for specific properties.

Your ICG representative can assist you in developing testing methods to formulate finished demulsifier formulated blends.

Handling:

Please refer to the Safety Data Sheet for further handling information.

Packaging:

The series of ICS-7000 products are available in drum, tote and bulk quantities.
